SUMMARY

Computer Science student with a solid foundation in web development, eager to apply my skills to real-world projects. Have strong problem-solving abilities in Data Structures and Algorithms (DSA)

SKILLS

Programming Languages : C, C++, SQL
Frontend Skills : HTML, CSS, JavaScript, TailwindCSS, GSAP, ReactJS
Backend Skills : NodeJs, ExpressJs, MongoDB, Socket.io

EDUCATION

2022 - Present	BTech in CS at **Lakshmi Narain College of Technology and Science**	(7.44)
2021	12th Standard CBSE Board	(74.40)
2019	10th Standard CBSE Board	(86.00)

PROJECTS

EcoMines link
- Designed a web-based tool to estimate CO2 emissions from coal mines efficiently.
- Implemented real-time data processing with Node.js and Express.js for seamless operations.
- Developed interactive dashboards using Chart.js to visualize CO2 emissions and coal productions.

Movie Recommendation webApp link
- Developed a ReactJS-based Movie Shows Browsing System for exploring diverse content.
- Integrated external APIs to fetch and display movies, shows, and actors. search, filtering, and detailed content views for seamless browsing.

LinkedIn-clone link
- Developed a LinkedIn clone with features like user authentication, profile creation, connections.
- Integrated ReactJS, NodeJs, ExpressJS, and MongoDB to deliver a seamless and responsive user experience.

ACHIEVEMENT

– CODEBETA winner 2024
– Solved 400+ DSA Problems on LeetCode, GFG,

CERTIFICATIONS

– Frontend Development at Sheryians Coding School, August 2023 - January 2024
– Backend Development at Sheryians Coding School, March 2024 - August
– Introduction to Database by Meta, September 2024 - September 2024
